

## O Spa Air Brush Tanning Details

1. Wear loose, dark clothing & sandals. Bronzer can rub off on light colored clothes.
2. We suggest that you wear or bring your bathing suit with you.
3. Bronzer is a temporary color and will wash off. The real tan will emerge within 4-6 hours. Do not shower or wash hands before the development time (We suggest using hand wipes).
4. Bronzer and DHA solution will **STAIN** leather and natural fibers.
5. O Spa will only guarantee complete and even coverage of your tan when you get a Salt Scrub prior to receiving the service. Tans usually last anywhere from 3-15 days. If you choose not to receive a Salt Scrub from us, then we suggest that you exfoliate (with a loofa or another exfoliant) prior to your Tanning.
6. Do not moisturize before your tan and **always** moisturize every day after.
7. For your convenience, we have disposable panties and boxers to wear during your tan or you may bring your own.

*Thank you for Tanning with O Spa and enjoy!*

*Disclaimer: Even though Airbrush Tanning is a fun and safe way to receive a tan, O Spa would like to reiterate that you may not receive the exact results you are seeking. The tanning solution may wear off easily from washing hands or feet and the tanning solution may attach itself to any dead skin cells that have not been removed, in turn, causing uneven skin color (darker or lighter tanning in some places). O Spa suggests that you purchase the Quick Tan Solution for extra coverage and touch-ups.*
